React (Introduction to React)

SD → Frontend → HTML / CSS / JS → Framework faster → React js → Library
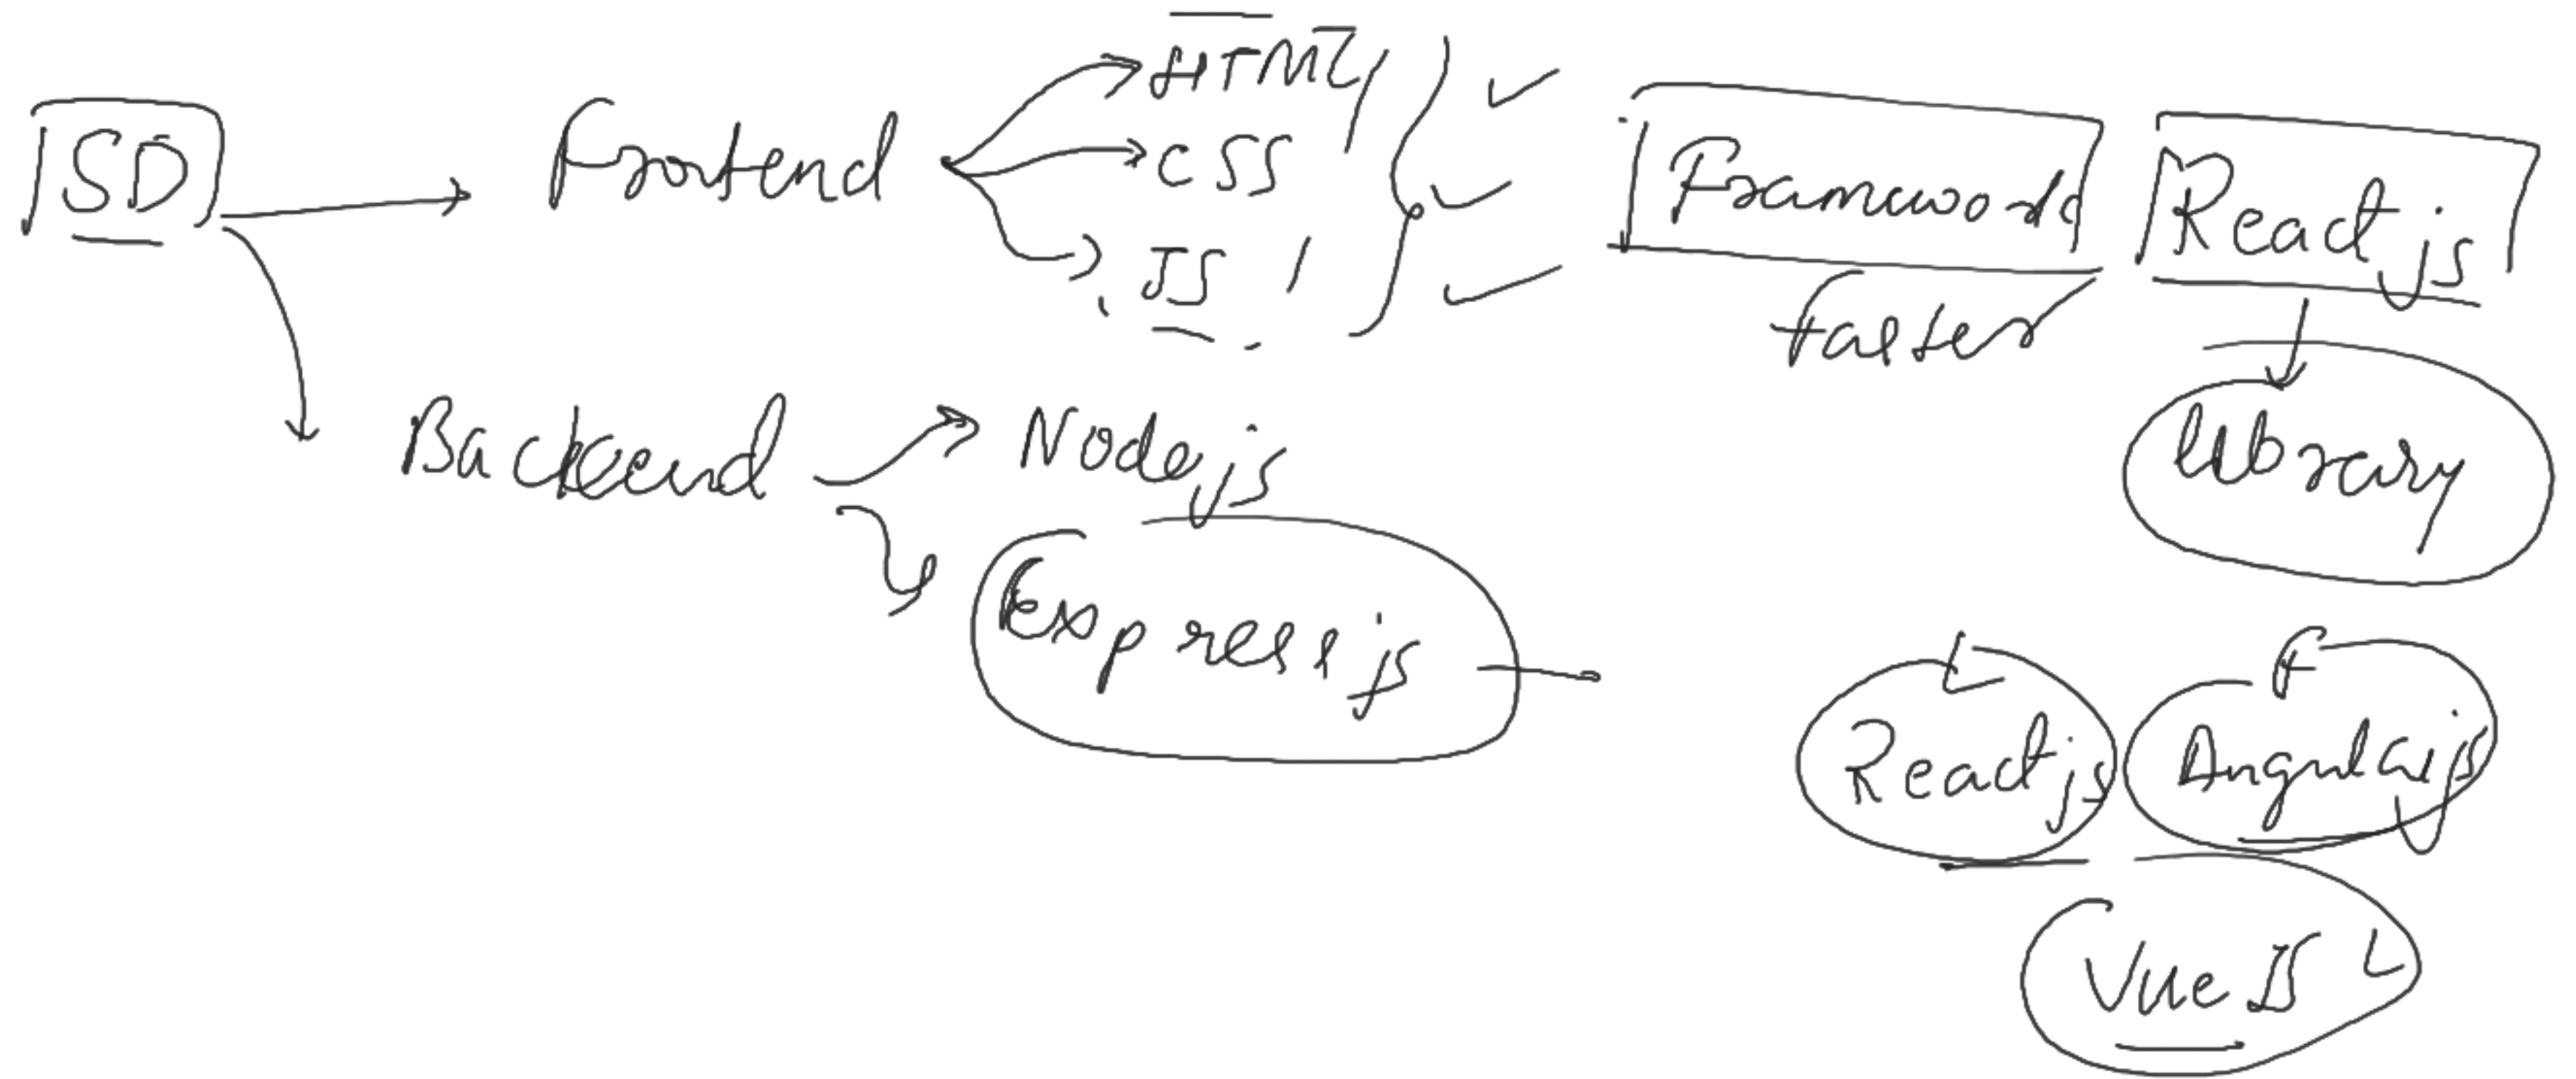

SD → Backend → Node js / Express js

React js   Angular js

Vue JS

How to Create new project using React

Installation of React on our Laptop

Step ① Node js Installed

Step ② npx create - react- app   app—name
                                         ↓
Step ③ cd app-name   whatever
       └→ go inside the
              react project which you have created.

Step ④ npm start ⟶ your react application will start

                running
