Input in React

form (form)

→ inp1

i/p 2

i/p 3

Submit
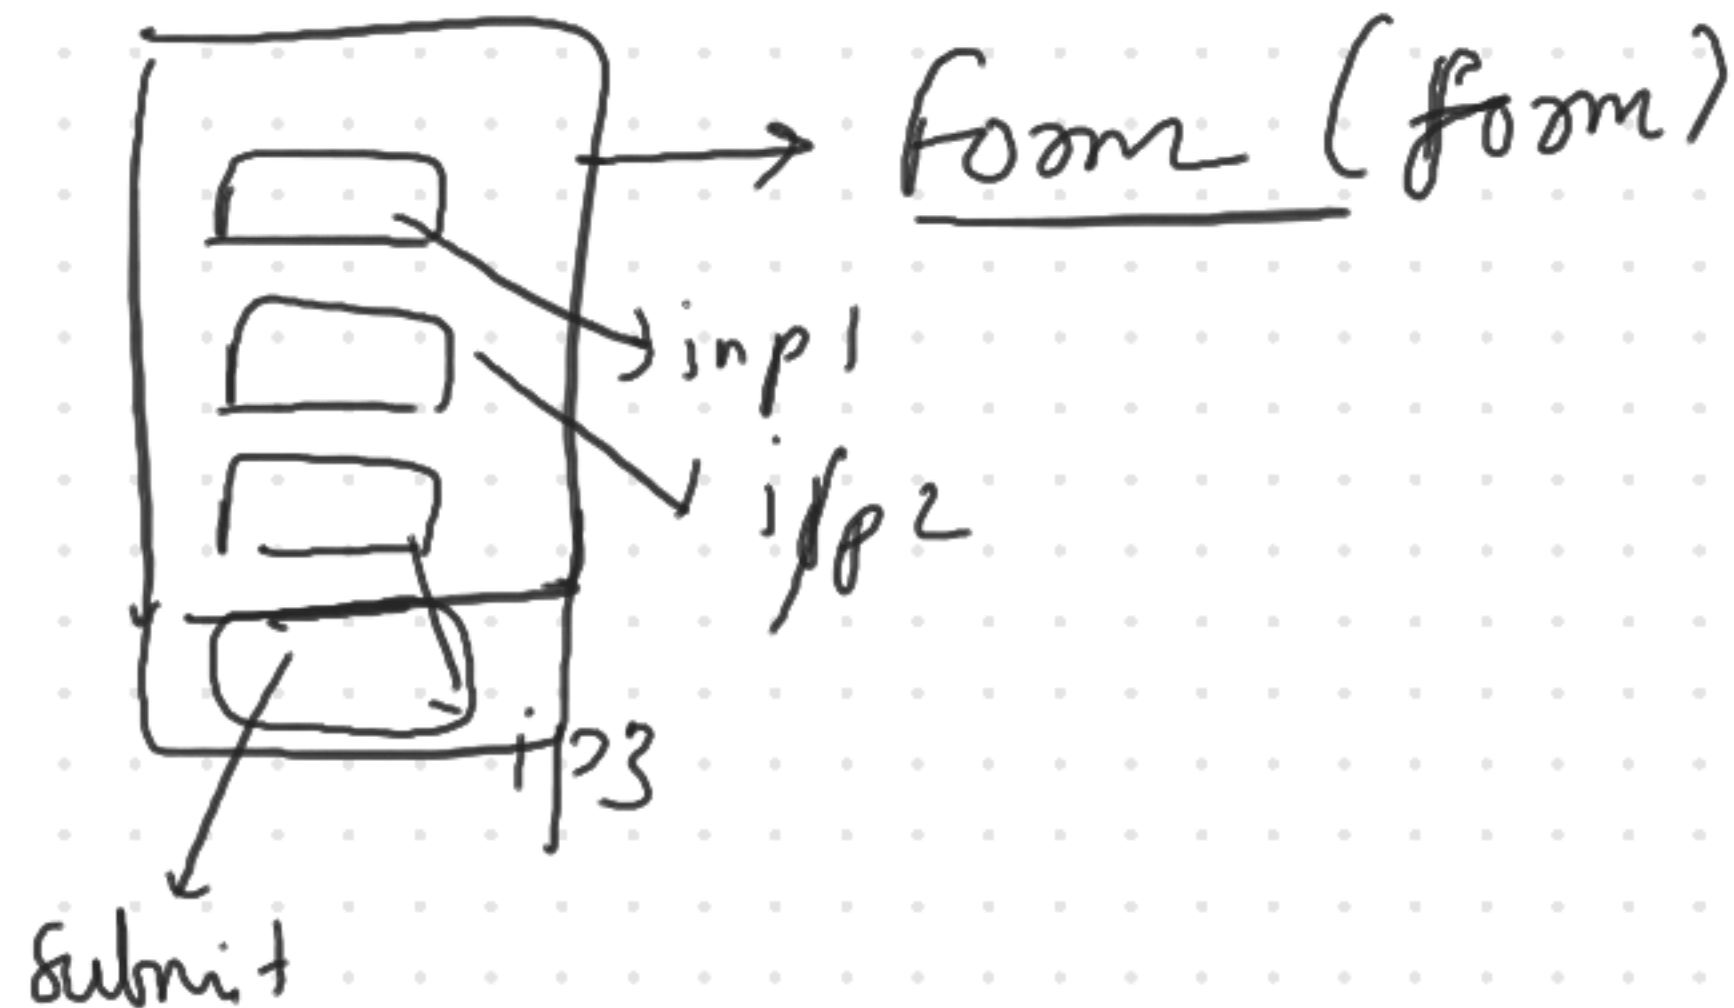

(★) input fields & submit button should be put inside form tag.

2 types of taking Input in React

Controlled Input

↓

It is Controlled by React

Uncontrolled Input

↓

Not controlled by react so you can control it how you want

(event = f

target

value :

temp
~~records~~ = {
  "name" : gentleman
}

config (temp['name'])

temp.name

}

}

→ event['target']['value']

→ event.target.value

setState('b')
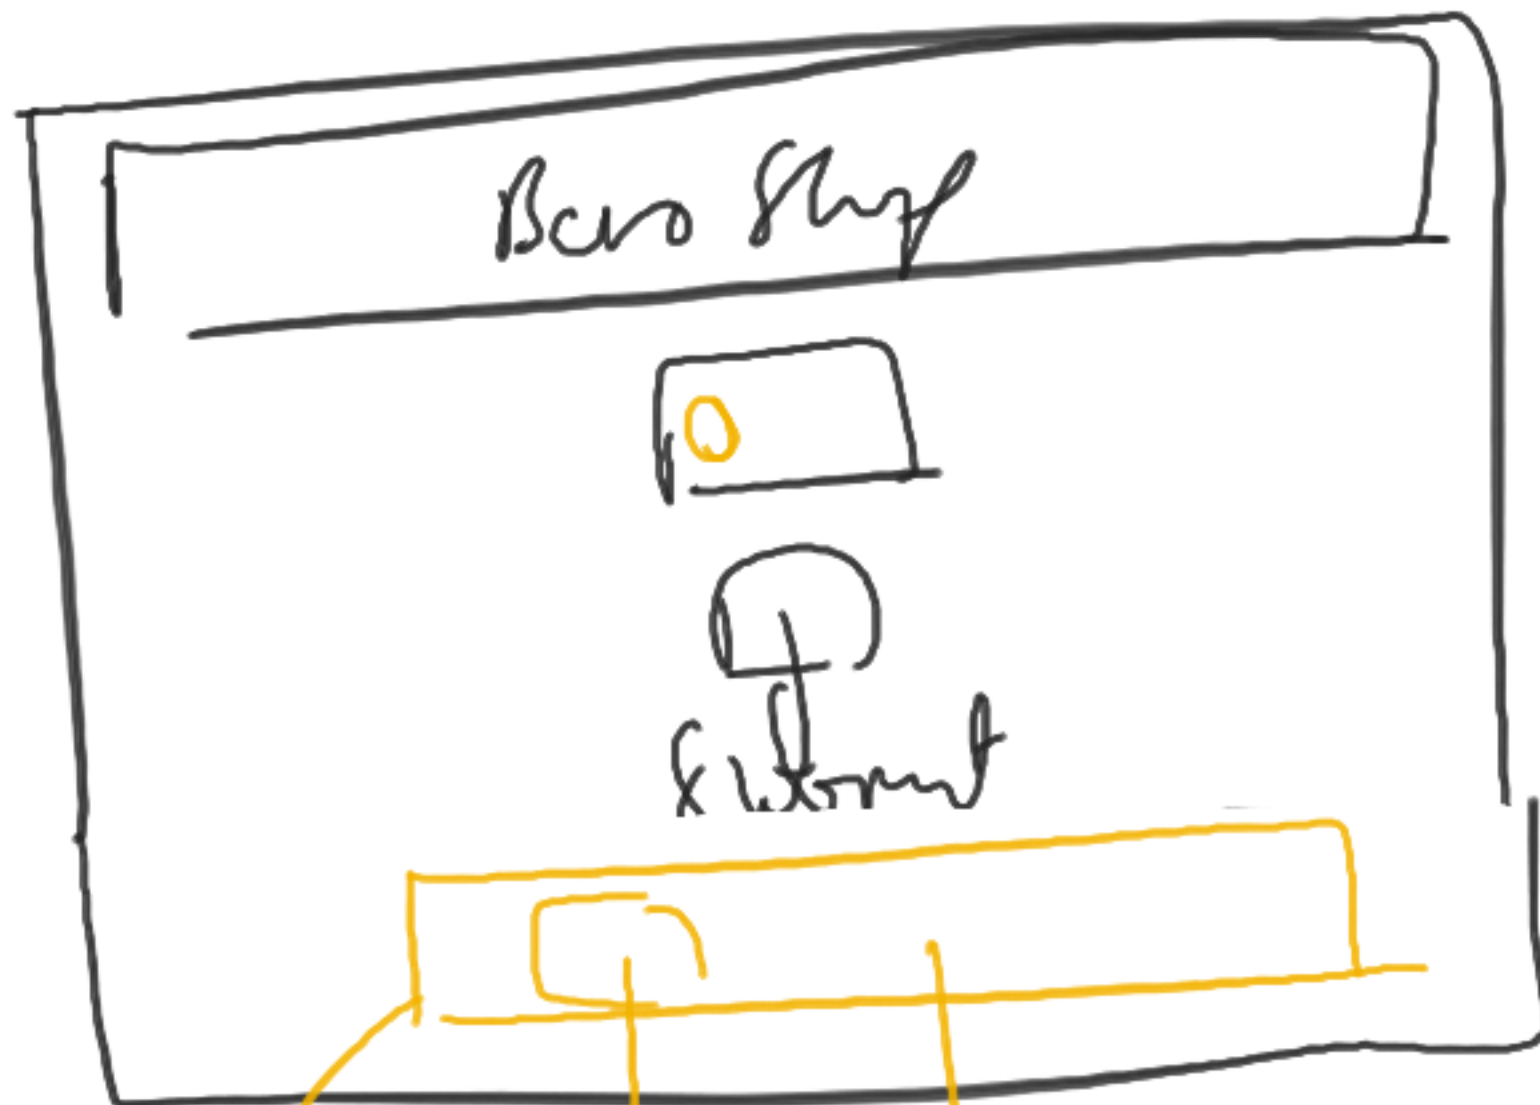

State ?

C18 ('c')

Beer Shop

0

Submit

dw

img   sent

"a"

① Display Nothing
"2"
② Enjoy you Beer

③ (sorry!)

"3"

< 18

State == "a"   null

State == "b"

State == "b"

Introduction to Complex forms

using (Formik) → handling forms.

How to use
